PROJECTS

Stock Market Analysis Project Using Binary LSTM Model

January 2023 — March 2023

Passionate about data science, I tackled a complex project: analyzing stock market trends with advanced machine learning methods. I created a high-level Stock Market Analysis application, harnessing Long Short-Term Memory (LSTM) models for stock price prediction and investment opportunity identification.

Paytm Wallet Application

April 2023 — July 2023

I embarked on an ambitious project to create a feature-rich Paytm Wallet application using HTML, CSS, JavaScript, and Node.js as the backend. This project showcases my passion for fintech and web development, emphasizing my commitment to secure and seamless digital transactions.

ANIMAL CLASSIFICATION USING CNN

July 2023 — October 2023

Created a project to classify animals using CNN in Python. I also built a user-friendly front-end with HTML, CSS, and JavaScript for easy interaction.
